W3C Brasil — **nic.br** Núcleo de Informação e Coordenação do Ponto BR — **cgi.br** Comitê Gestor da Internet no Brasil

The Brazilian Network Information Center (NIC.br) is a civil, not for profit entity, which implements the Brazilian Internet Steering Committee (CGI.br) decisions and projects. NIC.br activities include the coordination of domain names registration (Registro.br), handling Internet security incidents related to the Internet in Brazil (CERT.br), research and stufy on network and operations technologies (Ceptro.br), production of indicators on ICTs in Brazil (Cetic.br) and hosting the W3C Brazilian office.

MANDRILL

Use Mandrill to send automated one-to-one email like password resets and welcome messages, as well as marketing emails and customized newsletters. Mandrill is quick to set up, easy to use, and ridiculously stable. We made it for developers, who love documentation, integrations, high delivery rates, webhooks, and analytics. Mandrill comes with a beautiful interface and is the only email service with a mobile app that lets you monitor delivery and troubleshoot from wherever you are.

Engine Yard™

Engine Yard, the leading Rails hosting company, offers customers peace of mind, support and expertise when deploying their Ruby or Rails applications to the cloud. The Company provides a proven stack for deploying Ruby and Rails applications, either internally on its own infrastructure or externally to cloud platforms such as Amazon Web Services. Engine Yard has a track record of hiring expert talent and fostering open-source innovation, including projects like Rails and Rubinius.

ThoughtWorks

ThoughtWorks is a software company and community of passionate, purpose-led individuals all while seeking to revolutionize the IT industry and create positive social change. Founded over 20 years ago, ThoughtWorks has grown from a small group in Chicago to a company of over 3000 people spread across 30 offices in 13 countries: Australia, Brazil, Canada, China, Ecuador, Germany, India, Singapore, Turkey, South Africa, Uganda, the United Kingdom, and the United States.

GitHub

GitHub is the best place to share code with friends, co-workers, classmates, and complete strangers. Over eight million people use GitHub to build amazing things together. With the collaborative features of GitHub.com, our desktop apps, and GitHub Enterprise, it has never been easier to write better code, faster.

tempest
SECURITY INTELLIGENCE

Tempest Security Intelligence is a global cyber security consulting firm that has been delivering exceptional service quality to its clients since 2000. Tempest works to deliver the right combination of 24/7 managed security services, security testing projects, bespoke consulting projects and threat intelligence solutions.

CERS
CURSOS ONLINE

Quality, interactivity and innovation: these words define what CERS Cursos Online is. We are the biggest distance learning center of Brazil. We are dedicated to prepare people for exams to the public service and for the Lawyers Exam, by using a modern technology structure of videos transmission, which guarantee an efficient and pleasurable learning.

GENIUS

Genius is an online knowledge project whose goal is to annotate the world. What began as a website for decoding rap lyrics and evolved into the Internet's most comprehensive database of musical knowledge has now become a platform for adding your thoughts and commentary to any page on the Internet.

livingsocial

LivingSocial is the local marketplace to buy and share the best things to do in your city. With unique and diverse offerings each day, we inspire our members to discover everything from weekend breaks and longer trips away to one-of-a kind events and spa experiences to luxury dinners out and more.

amazon
web services

Launched in July 2002, the Amazon Web Services platform exposes technology and product data from Amazon and its affiliates, enabling developers to build innovative and entrepreneurial applications on their own. More than 150,000 developers have signed up to use Amazon Web Services since its inception.

Ruby & Rails IDE by JetBrains

RubyMine 7

Hone your craft.
Use the sharpest tools.

Por que RubyMine?

Turbine sua produtividade para todos os tipos de projetos Ruby
e tecnologias de ponta com o RubyMine, o poderoso IDE que entende
seu projeto e ajuda a produzir código de alta qualidade eficientemente,
graças ao acabamento de código inteligente, navegação poderosa,
opções de ajustes de código on the fly, refatorações automáticas
e seguras, integração com ferramentas de desenvolvimento essenciais,
espaço de trabalho customizável, além das facilidades avançadas em
testes e depuração.

O que há de novo?

Para todos nós na JetBrains, ser um desenvolvedor vai muito além
de codar no dia a dia. É também estar antenado em todas as novas
tecnologias surgindo todos os dias, lapidar suas habilidades de
programação e manter suas ferramentas tão afiadas quanto puderem
estar. Dito isso, podemos dizer que esta atualização poliu todos os
subsistemas do RubyMine, adicionando novas funcionalidades
e melhorias para te ajudar a escrever e manter código, incluindo
suporte a Chef e Puppet, integração com EditorConfig, melhorias
no depurador e nas annotations e muito mais.
